Infected with Date Regon ?   Free Scan

Description
The Date Regon program is a dialer.

Applications similar to the Date Regon program are primarily capable of accessing the victim's phone line through the connected computer.

This application may use the user's phone line in making phone calls to some phone services that are paid every minute. It may also make some long-distance calls or call phone numbers starting with 900 or 976. All these may be done without alerting the user.

Other sources claim that the Date Regon application may also connect the victim's computer to websites that automatically charge per-minute fees. Usually, these websites are said to be pornographic in nature. Many documents likewise state that the victim is usually unaware of this deal and will only know about it when the next phone bill arrives.

Experts suggest that malware similar to Date Regon program make unauthorized calls and connections as a form of payment.

Many researches have also confirmed that the Date Regon program infects only computers using phone lines to get connected to the Internet. Commonly, these connections are the standard modem or ADSL with sophisticated dialers. Meanwhile, users with satellite modems or cable connections are mostly immune to most dialer attacks.

The Date Regon program may add the listed files below on the infected system:

* Information.exe;
* connecting*.exe;
* smsdial*.exe;
* dating*.exe;
* URLDownload.exe;
* Het sex! *
* Connecting40.exe
* Kontaktannonser.lnk;
* XXX.lnk;
* and SMS-KUL.lnk.

Purportedly, the asterisk in the filenames represents three different numbers. The malware may also delete or add some registry entries or values on the infected machine so that it is enabled to run at startup.

The Date Regon program's vendor is allegedly Harrys Expo Ltd. It is known to use several aliases including:

* HAR-EXP Ltd;

* ScanBill;
* Let To Phone AB;
* ExNEt;
* Internet-B;
* GBR-Gruppen AB;
* and Trom Brom Srom.
*
According to some documents, the Date Regon application may be distributed by the websites http://www.oldgames.se, http://www.porrpost.com, http://www.hard.nu and http://ww.svenskporr.net.

The Date Regon application is only capable of infecting the Operating Systems of Microsoft Windows 9x, Microsoft Windows Vista and Microsoft Windows XP.
